

Software Requirements Specification(SRS)

Project Name: Centralized Institutional Alumni Tracking & Donation Portal (Mobile Application)

TEAM NAME : CODECRAFTERS

Team members :

- 1.Sabarna C
- 2.Sunethra R
- 3.Sakshini C

PURPOSE:

The purpose of the Centralized Institutional Alumni Tracking and Donation Portal is to provide a mobile application that enables educational institutions to maintain strong relationships with their alumni. The application allows alumni to update their profiles, participate in events, receive notifications, and make online donations. It also enables administrators to manage alumni records, organize events, and monitor donations through a centralized platform.

SCOPE:

The application provides a secure platform for alumni and administrators. Alumni can register, log in, edit their profiles, search for other alumni, participate in events, receive announcements, and make donations. Administrators can manage users, events, announcements, donations, and generate reports.

INTENDED USERS:

- Alumni
- current students
- Institution Administrator
- Institution Management

PHASE 1:

PRODUCT PERSPECTIVE :

The system is a mobile application connected to a centralized database. Alumni and administrators access the system through secure authentication.

PRODUCT FEATURES:

<i>User Registration</i>	<i>Secure Login</i>	<i>Alumni Profile Management</i>
<i>Event Management</i>	<i>Donation Management</i>	<i>Admin Dashboard</i>

FUNCTIONAL REQUIREMENTS:

FR1 – User Registration

- Alumni can create an account using email and password.*
- Registration details are stored securely.*

FR2 – Login

- Registered users can log in securely.*
- Invalid login attempts display an error message.*

FR3 – Profile Management

- Alumni can update personal and professional details.*
- Users can upload profile photos.*

FR4 – Alumni Directory

- Search alumni by name, batch, department, company, or location.*

FR5 – Event Management

- Display upcoming events.*
- Allow alumni to register for events.*
- Allow administrators to create, edit, and delete events.*

FR6 – Donation Module

- *Accept online donations.*
- *Generate digital receipts.*
- *Maintain donation history.*

FR7 – Notifications

- *Send announcements and reminders.*
- *Notify users about events and donations.*

FR8 – Admin Dashboard

- *Manage users*
- *Manage events*
- *View donations*
- *Generate reports*
- *Publish announcements*

PHASE 2 :

SYSTEM REQUIREMENTS :

Hardware:

- *iOS/android smartphone*
- *Internet connection*
- *Cloud server*

Software:

- *Frontend : React, HTML, CSS, JavaScript , Flutter*
- *Backend : Node.js/Express or Python (Django/Flask)*
- *Database : MySQL or MongoDB*
- *Payment : RazorPay*
- *UI Design : Figma*
- *Coding : VS Code*
- *Version Control : GitHub*

EXTERNAL INTERFACES:

Future Enhancements:

- AI Chatbot
- Alumni Mentoring
- Job Portal
- Scholarship Management
- QR Code Event Check-in
- iOS Support

- *Dark Mode*

PHASE 3 :

Expected Outcome:

PHASE REQUIRMENTS :

PHASE	NAME	EXPECTED OUTPUT
PHASE 1	Requirement Analysis & Planning	• Understand stakeholder needs (Students, Alumni, Admin) • Identify major challenges in alumni engagement • Finalize project scope and objectives • Prepare feature list and project roadmap • Choose the development platform and technology stack
PHASE 2	System Architecture & Design	• Create application workflow • Design UI wireframes and navigation • Plan database schema and relationships • Design backend architecture and APIs • Define authentication and authorization process • Prepare module-wise development plan

<i>PHASE 3</i>	<i>Development & Functional Prototype</i>	• <i>Develop login and registration system</i> • <i>Implement alumni profile management</i> • <i>Build mentorship, event, and donation modules</i> • <i>Integrate database with frontend and backend</i> • <i>Test core functionalities and fix issues</i> • <i>Deliver a functional prototype ready for presentation</i>
<i>PHASE 4</i>	<i>High Fidelity Design</i>	• <i>Design high-fidelity UI screens</i> • <i>Create reusable UI components</i> • <i>Define user interactions and navigation</i> • <i>Prepare API documentation</i> • <i>Finalize functional requirements for all modules</i>
<i>PHASE 5</i>	<i>Full Stack Integration & Testing</i>	• <i>Integrate frontend, backend, and database</i> • <i>Test authentication and user roles</i> • <i>Validate event, mentorship, and donation modules</i> • <i>Perform security and performance testing</i> • <i>Fix bugs and optimize application performance</i>

Conclusion:

The Centralized Institutional Alumni Tracking and Donation Portal will improve communication between alumni and the institution, simplify event management, maintain accurate alumni records, and provide a secure platform for online donations. The application will strengthen alumni engagement while reducing manual administrative work.
